Olesia KHRUSTALEVA

Senior Business Analyst | Investment Operations & Financial Reporting

linkedin.com/in/okhrustaleva +31 681 09 48 00 stetuk@gmail.com
Rotterdam, Zuid-Holland, the Netherlands

Senior Business Analyst, 18+ years in financial systems and investment operations. Recent Rabobank experience in core banking system migration, requirements engineering, system migration testing and gap analysis. Open for Senior BA/PO roles in the Netherlands.

Professional Experience

May 2026 – Jul 2024 | **Business Analyst at Rabobank — Investment Division, Utrecht, the Netherlands**

Large-scale core banking system migration programme.
Focus areas : tax reporting & data validation → corporate actions & SWIFT testing.

- Found critical defect in Belgian tax report (citizenship date boundary logic) — compliance risk eliminated before go-live.
- Created first legacy-to-new system mapping for corporate actions (STP transition); reduced testing ambiguity across teams.
- Tested SWIFT messages for corporate action types via Swagger (mandatory + voluntary); validated portfolio impact and cost price.
- Wrote change requests from gap analysis with operations; validated data across multiple Business Functional Runs.
- Built Python scripts (AI-assisted) to automate data extraction, comparison and validation; used DBeaver + DuckDB for local testing.

Azure DevOps | Oracle SQL Developer | Swagger | Confluence | SWIFT Messages | Python (AI-assisted)

Mar 2022 – Sep 2021 | **Team Lead at Quarta, Moscow, Russia**

Web-based accounting system for public sector (ministries, state agencies).

- Primary contact between dev team and end users; wrote agile stories, managed backlog, built feedback loop for change adoption.

Jira | PostgreSQL | Figma | Agile/Scrum

Sep 2021 – Jan 2005 | **Senior Analyst at Quarta, Moscow , Russia**

Financial reporting for Russia's public sector. Break : 2008–2009 (Tester, Instream Solutions).
Clients : Central Bank, Min. of Economic Development, State Duma, Presidential Administration.

- Designed financial reporting modules for national-level institutions — solutions operated years after handover.
- Automated manual reporting workflows; translated user needs into technical specs. Multiple clients offered employment.

Oracle SQL | Figma | Excel | User Interviews
